Applying For: Programmer

Dear Sir / Madam,

I have wide experiences in software and applications development for Web and Backend. I developed different applications by using varies of technologies such as using Spring boot. Moreover, I used to develop with front end web development by using HTML, CSS, Bootstrap etc. My qualifications include a Bachelor's Degree in Computer Science and one year of Web Application development experience. With today's technology I understand that Web application and Backend technology is very important and I would love the opportunity to be a part of the Backend development team.

For more information about my professional experiences see my structured curriculum via in attachment.

My structured curriculum will give you more detail picture of my background and experiences I have done. I believe that I will be a suitable candidate for this position in view of my education. I hope therefore, that on consideration of my resume, you will be persuaded of my potential to perform well as in Backend Java Developer. In the meantime, I look forward to hearing from you at your earliest convenience.

Sincerely,

Huo Sokkheang
